

Global Water Fund: Fact Sheet

31 May 2024

Investment Strategy & Objective

Ethical investing in global companies to achieve above average long-term, risk adjusted returns.

The Fund invests in listed companies connected to water quality, accessibility or sustainability. Water companies cover a wide range of activities, including water utilities, filtration, monitoring technology and the manufacture of pumps, pipes and irrigation equipment.

Some water companies may also have business activities not related to the water industry. Meaning they may not be a purely water industry exposure.

Fund Performance* (after fees, before tax)

| | 6 Months | 1 Year | 3 Years p.a. | 5 Years p.a. | 10 Years p.a. |

- Cash 9.9%

Investing Ethically

Firstly, we aim to avoid harm: to people, planet and animals. We do this via our exclusions, exceptions and divestment process when selecting and monitoring investments.

Next, we aim to do good. We consider Environmental, Social and Governance (ESG) data and tilt our portfolio towards positive investment themes (such as Renewable Energy, Water & Community Housing). We're particularly seeking companies that meet our financial investment criteria alongside our ESG focus and sustainable themes. We're a signatory to the UN Principles of Responsible Investment and aspire for our investment decisions to contribute to the UN's Sustainable Development Goals.

Climate Change. We believe climate change is a significant threat to our communities and ecosystems. We strive for our investment decisions to drive down the overall emission profile of our fund portfolio.

Please refer to our **Ethical Investment Policy** and to our **Exceptions Register** for more details.

Investor Suitability

The Global Water Fund is suited to an investor with a high tolerance to risk and a minimum investment timeframe of 10+ years.

The strategy has a majority weighting to international equities with the remainder in cash. Consequently, there will be higher volatility in the value of your investments which could result in low or negative returns.

Risk Indicator

See the Pathfinder website for further information on the calculation of the risk indicator.

Top 10 Holdings
