The Fund invests directly in listed property companies that satisfy Pathfinder’s ethical investment criteria. The Fund targets a portfolio of 50 to 100 property companies.

Total value of the fund	\$16,636,182.46
Date the fund started	23 July 2015

What are the risks of investing?

Risk indicator for the Pathfinder Global Property Fund:

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund’s assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at <https://sorted.org.nz/tools/investor-profiler/>

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund’s future performance. The risk indicator is based on the returns data for the 5-year period from 1 April 2021 to 31 March 2026. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.

See the Product Disclosure Statement (**PDS**) for more information about the risks associated with investing in this fund.

How has the fund performed?

Pathfinder Global Property Fund	Average over the	
	Past 5 years	Past year
Annual return <small>(after deductions for charges and tax)</small>	0.80%	3.65%
Annual return <small>(after deductions for charges but before tax)</small>	1.66%	4.50%
Market index annual return <small>(reflects no deductions for charges and tax)</small>	2.95%	8.65%

The market index annual return is based on the FTSE EPRA/NAREIT Global Real Estate Index (net of dividends and withholding tax; 75% hedged to NZ dollars), see Note 1 below. Additional information about the index is available on the offer register at <https://disclose-register.companiesoffice.govt.nz/> (search Offers, using Offer OFR10780, Documents, Other Material Information).

Annual Return Graph

This shows the return after fund charges and tax for each year ending 31 March since the fund started. The last bar shows the average annual return for the last 10 years up to 31 March 2026.

Important: this does not tell you how the fund will perform in the future.

Returns in this update are after tax at the highest prescribed investor rate (**PIR**) of tax for an individual New Zealand resident. Your tax may be lower.

What fees are investors charged?

Investors in the Pathfinder Global Property Fund are charged fund charges. In the year to 31 March 2026 these were:

Pathfinder Global Property Fund	% of net asset value
Total fund charges* (which are made up of)	1.00%
Total management and administration charges: Including-	1.00%
Manager's basic fee	1.00%
Other management and administration charges	0.00%

*All amounts exclude any applicable GST

Individual action fees: Investors may also be charged individual action fees for specific actions or decisions (for example, for withdrawing from or switching funds). See the [PDS](#) for more information about those fees on the offer register at <https://disclose-register.companiesoffice.govt.nz/>.

Small differences in fees and charges can have a big impact on your investment over the long term.

Example of how this applies to an investor

Angela had \$10,000 in the fund at the start of the year and did not make any further contributions. At the end of the year, Angela received a return after fund charges were deducted of \$450 (that is 4.50% of her initial \$10,000). Angela did not pay any other charges. This gives Angela a total return after tax of \$365 for the year.

Notes:

1. **Market Index:** We have changed the market index for the Global Property Fund from the Morningstar US Real Estate Sector Index to FTSE EPRA/NAREIT Global Real Estate Index in 2020, because the new index has global coverage and is more representative of the Global Property Fund which also invests globally. This is not a material change as the two indexes' returns are broadly similar. Note that the benchmark hedged returns are assessed using a simplified proxy methodology, which is calculated using monthly rebalancing. For further details please refer to this [blog](#).
