What are the risks of investing?

Risk indicator for the Pathfinder Green Bond Fund:

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund’s assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at <https://sorted.org.nz/tools/investor-profiler/>.

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund’s future performance. The risk indicator is based on the returns data for the 5-year period from 1 January 2020 to 31 December 2024. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.

See the Product Disclosure Statement (**PDS**) for more information about the risks associated with investing in this fund.

Also, see Note 1 for information on the risk indicator calculation.

How has the fund performed?

| Pathfinder Green Bond Fund | Past year |
|--|-----------|
| Annual return (after deductions for charges and tax) | 1.38% |
| Annual return (after deductions for charges but before tax) | 1.90% |
| Market Index Annual return (reflects no deductions for charges and tax) | 3.03% |

The market index annual return is based on the Bloomberg Global Aggregate Index hedged to New Zealand dollar (gross of dividends, 100% hedged to NZD).

Additional information about the index is available on the offer register at <https://disclose-register.companiesoffice.govt.nz/> (search Offers, using Offer OFR10780).

Annual Return Graph

This shows the return after fund charges and tax for each year ending 31 March since the fund started. The last bar shows the average annual return since the fund started, up to 31 December 2024.

Important: this does not tell you how the fund will perform in the future.

Returns in this update are after tax at the highest prescribed investor rate (**PIR**) of tax for an individual New Zealand resident. Your tax may be lower.

What fees are investors charged?

Investors in the Pathfinder Green Bond Fund are charged fund charges. As at 31 March 2024 Fund fees are:

| Pathfinder Green Bond Fund | % of net asset value |
|--|----------------------|
| Total fund charges ¹ | 0.58% |
| (which are made up of) | |
| Total management and administration charges: -including | 0.58% |
| Manager's basic fee | 0.19% |
| Other management and administration charges** | 0.39% |

¹ All amounts exclude any applicable GST

** Other charges comprise fees paid by the Fund to Metlife Investment Management Limited who is the sub-investment manager for the Fund.

Performance fees and individual action fees: There are no performance fees or individual action fees.

Small differences in fees and charges can have a big impact on your investment over the long term.

Example of how this applies to an investor

Angela had \$10,000 in the fund at the start of the year and did not make any further contributions. At the end of the year, Angela received a return after fund charges were deducted of \$190 (that is 1.90% of her initial \$10,000). Angela did not pay any other charges. This gives Angela a total return after tax of \$138 for the year.

Notes:

1. Risk indicator: The risk indicator is not a guarantee of a fund’s future performance. Market index returns as well as the fund’s actual returns have been used to fill in the risk indicator because the risk indicator is calculated using returns data for the five-year period ending on 31 December 2024. Market index returns have therefore been used for the period from 1 January 2020 to 27 January 2023 when the fund was not in existence, and actual fund returns have been used since then. As a result of those returns being used, the risk indicator may provide a less reliable indicator of the potential future volatility of the fund. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.
