Pathfinder

Invest in better, *without compromising on returns.*

Pathfinder KiwiSaver Plan and Managed Funds

Certified B Corporation

We believe that how you invest your money has the *power to change the world.*

Making money and having good ethics can feel contradictory – but it doesn't have to be. We aim to make good money. Growing your wealth via good investments – such as renewable energy, healthcare, water infrastructure, technology and community housing.

Certified Responsible Investment – Certified by RIAA

Impact of ethics on returns

Our 'investible universe' (think: things we can invest in) is smaller than fund managers who aren't ethical investors. However, we believe the investments in this reduced list will be both better for people, our planet, and animals AND have the potential to generate strong returns.

Why? We believe that companies who think widely about their impact consider future events that could adversely affect their earnings and plan to avoid or mitigate them – potentially making them higher-quality companies.

Why pick Pathfinder?

Only Ethical

Ethical funds are all we offer; we've been investing ethically since 2010.

Focus on Returns

We're active ethical investors aiming to deliver strong returns.

Certified B Corp

As a business, we focus on better environmental and social outcomes.

Committed to New Zealand

Pathfinder is 100% locally owned, our investments include inspiring Kiwi growth companies.

Pathfinder & Climate Change

Some examples of how we are investing in better, when it comes to the environment (and the people and animals who rely on it).

- Across our entire portfolio, 53%* of the listed companies we invest in are committed to a Science Based Target Initiative (SBTi). A strong indicator of walking the talk when it comes to reducing carbon emissions.
- Our Green Bond Fund is dedicated to funding projects targeting climate positive environmental solutions (think renewable energy & clean rail).
- Pathfinder has joined the Net Zero asset managers initiative (NZAM) - this equips us with the tools to implement our climate policy & makes us publicly accountable. It's one way to show how serious we are about working to reduce the threat of global warming through our investing.

*as at 31 March 2025.
